SWIM

Week 02 Swim

Week 2 of 52 | Mon 12 Oct 2026 to Sun 18 Oct 2026 | Month 1: Kick, balance and feel for the water

Tuesday, 13 Oct Swim A - Kick and balance (50 min)

Focus: Hip-driven kick, rotation from the core

Section	Details
Warm-up	200 easy FS, 100 kick with board
Kick set	6 x 50 Kick with board r20 (small, fast, from the hips)
Drills	4 x 50 Kick on side r20 4 x 50 6-3-6 r20 4 x 50 Catch-up r20
Main set	4 x 150 FS steady r30 at training pace (400 pace + 10 s/100). Stroke count on the last 25 of each.
Cool-down	100 easy

Total: about 1800 m

Friday, 16 Oct Swim B - The catch (50 min)

Focus: High elbow, forearm pressing back

Section	Details
Warm-up	200 easy FS, 4 x 50 Build r20
Drills	4 x 50 (25 Sculling / 25 FS) r20 4 x 50 (25 Fist / 25 FS) r20 4 x 50 (25 Single-arm right / 25 Single-arm left) r20 4 x 50 (25 Fingertip drag / 25 FS) r20
Main set	8 x 75 FS steady r20. Think: fingertips down early, elbow high, press the water back toward your feet.
Cool-down	100 easy

Total: about 1900 m

Drill cue cards for this week

Drill	How to do it and what it trains
Kick with board	Board held at arm's length, face in the water, exhale, breathe forward or to the side. Kick comes from the hips with a soft knee, toes pointed, ankles loose. Small and fast beats big and slow. Purpose: leg endurance and ankle flexibility.
Kick on side	One arm extended in front, palm down, other arm on your hip. Ear rests on the extended arm, body rolled about 45 degrees, hips at the surface. Kick steadily; rotate the head to breathe without lifting it. Switch sides every 25. Purpose: balance and body line.
6-3-6	Six kicks on one side (as in Kick on side), three full strokes, six kicks on the other side. Keep the hips high and the extended arm still while kicking. Purpose: rotation, balance, and timing the arm switch with the hips.
Catch-up	Both arms start extended. One arm pulls and recovers while the other waits out front; the recovering hand touches the waiting hand before the next stroke starts. Purpose: long stroke, front-quadrant timing, patience in the glide.
Stroke count	Count strokes per 25 m (one arm = one stroke). Write down your normal count, then try to hold pace with one fewer. Purpose: efficiency and distance per stroke.

Drill	How to do it and what it trains
Build 50	Start the 50 easy and finish it fast, without letting the stroke shorten. Purpose: learning to raise speed by pressing harder on the water, not by spinning the arms.
Sculling (front)	Arms extended in front, elbows slightly bent, hands sweep in and out in small figure-8s with the palms angled like a windshield wiper. Head down, gentle kick or pull buoy. Move forward slowly. Purpose: feel for the water and catch pressure.
Fist drill	Swim freestyle with closed fists. You will feel the forearm doing the work. After 25 m of fists open the hands and notice the extra grip. Purpose: early vertical forearm and feel for the water.
Single-arm	One arm swims, the other stays extended in front. Breathe to the side of the working arm. Focus on the catch: fingertips down, elbow high, press back not down. Switch arms every 25. Purpose: catch mechanics and rotation.
Fingertip drag	Swim normally but during the recovery let the fingertips trail along the surface, elbow high and pointing to the ceiling. Purpose: relaxed, high-elbow recovery and shoulder rotation.
