SWIM

# Week 06 Swim

Week 6 of 52 | Mon 09 Nov 2026 to Sun 15 Nov 2026 | Month 2: Keto adaptation 2: one more rep

The idea this month: short fast lengths with full rest, stroke count as the honesty check, fins as a teaching tool. Endurance volume comes back once the fast stroke is the default. 25 m pool. Every swim is 700-1,100 m and 22-35 minutes.

## Monday, 09 Nov  Swim 1 - Fast 25s, fins on and off  (30 min)

**Focus:** Ten fast lengths, half with fins. The fins show you the position; the bare-foot ones are where you keep it.

| Section | Details |
|---|---|
| Warm-up | 100 kick with fins (board, or on your back), then 100 easy FS. Fins are fine for every kick this month; bare-foot kick is not a speed set for anyone. |
| Drills | 4 x 50 (25 Catch-up / 25 FS) r20 |
| Main | 10 x 25 fast r30, alternating fins / no fins. On the no-fin ones hold 12-13 strokes; that is the whole game. |
| Easy | 4 x 50 FS r20 |
| Cool-down | 100 easy, any stroke, finish with the shoulder loose, not worked. |

**Total:** about 950 m

**Notes:** Fast means the quickest stroke you can hold at 12-13 strokes per 25 m (your count on 30 Oct). If the count climbs to 15-16 you are muscling it: take the full rest and swim the next one smoother, not harder. Rest is part of the set, never shorten it. Shoulder gate: the fast set happens only if the morning after the last swim was 0-1/10 (0 = no pain). At 2-3, swim the same distance easy instead. Sharp pain above 3 during a swim: kick and drills only, stop pulling. Fins yes, paddles no.

## Thursday, 12 Nov  Swim 2 - 25 fast / 25 easy, longer  (30 min)

**Focus:** Two more 50s than last week, same rule.

| Section | Details |
|---|---|
| Warm-up | 100 kick with fins (board, or on your back), then 100 easy FS. Fins are fine for every kick this month; bare-foot kick is not a speed set for anyone. |
| Drills | 4 x 50 6-3-6 r20 |
| Main | 8 x 50 as 25 fast / 25 easy r30. Fins on the even reps. Try to make the fast 25 without fins feel like the one with fins: hips high, quick turnover, not more kick. |
| Cool-down | 100 easy, any stroke, finish with the shoulder loose, not worked. |

**Total:** about 900 m

**Notes:** Fast means the quickest stroke you can hold at 12-13 strokes per 25 m (your count on 30 Oct). If the count climbs to 15-16 you are muscling it: take the full rest and swim the next one smoother, not harder. Rest is part of the set, never shorten it. Shoulder gate: the fast set happens only if the morning after the last swim was 0-1/10 (0 = no pain). At 2-3, swim the same distance easy instead. Sharp pain above 3 during a swim: kick and drills only, stop pulling. Fins yes, paddles no. No pool today? 30-40 min elliptical at a conversational effort is the fallback, not a replacement to prefer.

## Drill cue cards for this week

| Drill | How to do it and what it trains |
|---|---|
| Catch-up | Both arms start extended. One arm pulls and recovers while the other waits out front; the recovering hand touches the waiting hand before the next stroke starts. Purpose: long stroke, front-quadrant timing, patience in the glide. |
| Stroke count | Count strokes per 25 m (one arm = one stroke). Write down your normal count, then try to hold pace with one fewer. Purpose: efficiency and distance per stroke. |
| 6-3-6 | Six kicks on one side (as in Kick on side), three full strokes, six kicks on the other side. Keep the hips high and the extended arm still while kicking. Purpose: rotation, balance, and timing the arm switch with the hips. |

## Shoulder and stroke log (0 = no pain, 10 = worst pain)

| Session | Shoulder during | Next morning | Strokes per 25, fast | Best 25 or 50 time | Notes |
|---|---|---|---|---|---|
| Monday | | | | | |
