SWIM

Week 06 Swim - paused

No swim is scheduled this week.

Why

Shoulder recovery. Swimming resumes after two weeks of pain-free pressing (push-ups, floor press) and daily life. When that day comes, the first session is 20 minutes: 200 easy, 6 x 50 kick with board, 4 x 50 kick on side, 4 x 50 catch-up, 100 easy. No pulling sets, no paddles. If you swim this week on your own, write it in the next reflection. The Swim Drill Glossary in 00 - Plan Overview is still the pool sheet.
